

Application:

Self-healing polypropylene metallized dielectric capacitor, was designed as filter capacitor with destination to smooth out pulsating direct voltage.

Technical data:

Rated capacitance

16 μ F

Capacitance tolerance

$\pm 10\%$

Rated voltage

7 kVDC

Permissible operating surge

12 kVDC/0,2s

Electrical strength:

- between terminals

10,5 kVDC/2s

- between interconnected terminals and casing

12 kVAC/60s

Climatic category:

-30°C ÷ 60°C

Impregnant: NON PCB and chlorides.

Sheet steel casing coated a grey paint.

Terminations screws M12 with nuts.
