

Application:

Self-healing polypropylene metallized dielectric capacitor, was designed as filter capacitor with destination to smooth out pulsating direct voltage.

Technical data:

Rated capacitance

2x220 μ F

Capacitance tolerance

$\pm 10\%$

Rated voltage

750 VDC

Electric strength:

- between terminals

1000 VDC/2s

- between interconnected terminals and casing

9,5 kVAC/60s

Climatic category

-25°C ÷ 60°C

Sheet steel casing coated a grey paint.

Terminations: screws M6 with nuts.

Impregnant: polyurethane-epoxy composition.
